

AI Outcomes for Healthcare

Structured AI Adoption Methodology

The Healthcare AI Challenge

Clinical AI is risky without proper governance. Shadow AI in healthcare is a compliance nightmare, with clinicians using consumer AI tools for patient-adjacent tasks without oversight. Meanwhile, promising AI pilots for clinical decision support, patient engagement, and operational efficiency fail to scale because trust and adoption weren't designed in from the start.

Conversation Starter

"How are you ensuring AI governance for clinical applications? Most health systems are struggling with the gap between AI potential and safe deployment."

How OAIO Helps

OAIO provides a structured approach to clinical AI that addresses HIPAA compliance, patient safety, and clinician trust. Instead of enterprise-wide data transformation, we assess readiness for specific clinical AI agents—enabling faster time-to-value with appropriate guardrails.

Priority AI Use Cases in Healthcare

- Clinical decision support with appropriate guardrails
- Patient engagement and communication automation
- Administrative burden reduction (documentation, scheduling)
- Revenue cycle optimization and coding assistance
- Care coordination and discharge planning
- Population health analytics and risk stratification

The OAIO Approach

For Healthcare organizations, OAIO delivers:

- Industry-specific AI opportunity assessment (Pillar 1)

- Data readiness evaluation for healthcare systems (Pillar 2)
- Governance framework addressing healthcare compliance (Pillar 3)
- User experience design for healthcare workflows (Pillar 4)
- FinOps modeling with industry-relevant benchmarks (Pillar 5)
- Engineering documentation for implementation (Pillar 6)

Cloud Partnership Advantage

OAIO is delivered in partnership with AWS, Microsoft, and Google Cloud. Cloud partners subsidize engagements and provide technical validation, ensuring healthcare organizations get access to the latest AI capabilities with reduced financial risk.

Next Steps

Contact your Orion representative to discuss how OAIO can accelerate AI adoption at your healthcare organization.
