

# AI Outcomes for Legal Services

## Structured AI Adoption Methodology

### The Legal Services AI Challenge

Law firms are experimenting with AI for document review, contract analysis, and legal research, but adoption remains low because attorneys don't trust the output. The accuracy requirements for legal work are stringent, and without proper validation frameworks, AI remains a novelty rather than a productivity multiplier.

### Conversation Starter

*"Are your attorneys actually using AI, or just testing it? The adoption gap in legal AI is huge—how are you addressing trust?"*

### How OAIO Helps

OAIO builds attorney confidence in AI through proper validation and oversight frameworks. We design AI interactions that fit legal workflows, with appropriate human review points and audit trails that satisfy professional responsibility requirements.

### Priority AI Use Cases in Legal Services

- Document review and e-discovery acceleration
- Contract analysis and risk identification
- Legal research and precedent analysis
- Due diligence automation
- Client intake and matter assessment
- Billing optimization and matter budgeting

### The OAIO Approach

For Legal Services organizations, OAIO delivers:

- Industry-specific AI opportunity assessment (Pillar 1)

- Data readiness evaluation for legal services systems (Pillar 2)
- Governance framework addressing legal services compliance (Pillar 3)
- User experience design for legal services workflows (Pillar 4)
- FinOps modeling with industry-relevant benchmarks (Pillar 5)
- Engineering documentation for implementation (Pillar 6)

## Cloud Partnership Advantage

OAIO is delivered in partnership with AWS, Microsoft, and Google Cloud. Cloud partners subsidize engagements and provide technical validation, ensuring legal services organizations get access to the latest AI capabilities with reduced financial risk.

## Next Steps

Contact your Orion representative to discuss how OAIO can accelerate AI adoption at your legal services organization.
